Mr. Freeman, a friend and neighbor of The True Mr. Walcott, He also, had come home weary dispirited and almost sick. The trials of the day had been unusually severe, and when he looked anxiously forward to scan the future not even a gleam of light was seen along the horizon, as he stepped across the threshold of his dwelling, a pang shot thro' his heart, for

the thought came. " How slight the present holds upon all these comforts?" Not for himself but for his wife and children, was the pain.

"Father's come !" cried a glad little voice on the stairs, the moment his footfall sounded in the passage, then quick pattering feet were heard-and then a tiny form was springing into his arms. Before reaching the sitting room above, Alice, the eldest daughter was by his side her arm drawn fondly within his, and her loving eyes lifted to his face. "Are you not late, dear ?" It was the

gentle voice of Mrs. Freeman. Mr. Freeman could not trust himself to answer. He was too deeply troubled in spirit to assume at the moment, a cheerful tone, and he had no wish to sadden the hearts that loved him, by letting the depression from which he was suffering, become too closely apparent. But the eyes of Mrs. Freeman saw quickly below the surface. "Are you not well?" she inquired ten-

derly, as she drew his large arm chair gia: toward the centre of the room. "A little headache," he answered, with a slight evasion.

Scarcely was Mr. Freeman seated ere removing gaiter and shoe, and supplying their place with a soft slipper. There was not one in the household who did who did not seek to render him some kind office.

It was impossible under such a burst of heart-sanshine for the spirit of Mr. Freeman long to remain shrouded. Al most imperceptibly to himself gloomy thoughts gave place to more cheerful ones, and by the time tea was ready he had forgotten the fears which had haunted him through the day.

But they could not be held back alto gether, and their existence was marked. during the evening, by an unusual silence and abstraction of mind. This was ob served by Mrs. Freeman, who, more than half suspecting the cause, kept back from her husband the knowledge of certain add to his mental disquietude. During the evening, she gleaned from something he said, the real cause of his changed as into conversation on the subject of home expenses, and the propriety of restricting in various points.

Many things were naturally pronounced superfluous, and easily dispensed with ; and before sleep fell soothingly on the heavy eyelids of Mr. Freeman that night, an entire change in their style of living had been determined upon-a change that would reduce their expenses at least one-

"I see a light ahead," were the hope fol words of Mr. F., as he resigned him self to slumber.

With renewed strength of mind and body, and a confident spirit, he went forth the next day-a day that he had looked forward to with fear and trembling. And it was only through this renewed strength and confident spirit that he was able to overcome the duties that loomed up mountains high, before him, Weak deshad proved his tower of strength-his walled city. She no longer refused, but quietly took the cup which he offered; and it was the last, LAST time she ever called upon her brother for an act of kindness. Ere another day had passed she stood beside the River of Life, and drank of its cool waters, never to thirst again. And of all who wept over that little brown coffin, as it lay upon the table before the pulpit, there were none who shed more bitter tears than that little boy, who could not forget that he had refused the last request of his little sister.

Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the blood. There it acts as an irritating poison on the internal viscera and exercting organs of the body. The liver becomes torpid and fails to secrete not, only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our organism as if in an attenut to expel the povious ganism, as if in an attempt to expel the noxious infusion, concentrates the whole blood of the body in the internal excretories to force them to cast it is the CHILL. But in this effort it fails. Then the FEVER follows, in which the blood leaves the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system abandons the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or paroxysms of Fever and Ague. Such constitutional disorder will of course under-mine the health if it is not removed. We have labored to find, and have found, an

Ayer's Ague Cure,

which neutralizes this malarious poison in the blood, and stimulates the liver to expel it from the As it should, so it does cure this afflicting disorder with perfect certainty. And it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health although exposed to the disease. System in health atthough exposed to the disease. Consequently it not only cures, but protects from, the great variety of affections which are induced by this malignant influence, such as Remittent Fever. Chill Fever, Dumb, or Masked Ague, Periodical Headache, or Bilious Headache, Bilious Fevers, Neuralgia, Rheumatism, Gout, Blindness, Toothache, Earache, Catarrh, Asthma, Palpita-tions, Painful Affections of the Spleen, Hysteries, Colic, Paralysis, and Painful Affections of the Stomach and Bowols, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "AGUE CURE" removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excre-tories to expel the virus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatation. Time may accomplish the same end, but often life is not long enough, or is sacrificed in the attempt, while this "AGUE CURB" does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.

PREPARED BY DR. J. C. AYER & CO. LOWELL, MASS. PRICE ONE DOLLAR PER BOTTLE.

Ayer's Cherry Pectoral has won for itself such a renown for the cure of every variety of Throat and Lung Complaint, that it is entirely unnecessary for us to recount the evidence of its virtues, wherever it has been em-ployed. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do.
